

Digital learning

Your digital learning partner

From induction to deep dives, we use several approaches to make the most of digital learning technologies, including blended and virtual learning solutions. PwC's Academy can support you and your business in developing a wide array of digital training programmes meeting your business requirements. The approach adopted by PwC's Academy is to work closely with you to co-design the best type of digital interaction that yields best returns.

We propose online training courses on a wide range of topics and make them accessible via industry-ensowned platforms whilst their progress can be monitored remotely. The platforms allow learners to pause and restart a learning process as necessary, as their activity is constantly logged.

PwC's Academy can support you in establishing a wider learning strategy that comprises both traditional training complemented with digital learning routes.

Our range of digital learning services includes:

- Designing and producing customised e-learning packages
- Learning analytics and trainer reporting
- Hosting of e-learning packages including user administration and support
- Updating the digital content according to market or regulatory changes

Overview of our e-learning offering

AML

EN/FR

This innovative e-learning uses gamification to assess your knowledge of in-force legal and regulatory AML requirements through the resolution of a case study. This e-learning has been developed in two versions: one dedicated to European regulations and another one specific to Luxembourg. We also developed a version dedicated to insurance professionals.

Cybersecurity

EN

Thanks to these four e-learning modules, you will discover the different types of cyber threats and learn how to outsmart the hacker and to implement best practices in your workplace.

DAC6

EN

On top of the “**DAC6 e-learning**”, our “**DAC6 digital assessment**” will allow you to assess your knowledge on the DAC6 regulation and its requirements. It aims at covering both technical and operational dimensions to provide learners with the essential knowledge of the regulation. It includes real-life examples and a final quiz.

GDPR

EN/FR

This modular e-learning proposes two proficiency levels (essentials and advanced) to provide learners with a thorough understanding of the regulation in accordance with their needs.

Overview of our e-learning offering

MiFID II training curriculum

EN

This extensive curriculum is designed around three complementary building blocks:

- The “**MiFID II certification**” includes a comprehensive e-learning suite to meet knowledge and competence criteria around five fundamental thematic pillars. A path is specifically designed respectively for advisers and information givers.
- The “**MiFID II digital assessment**” supports the annual assessment of general knowledge and competence around MiFID II requirements in the context of the CSSF circular 17/665.
- The “**MiFID/MiFIR: key requirements**” digital tutorial of the e-learning suite is also available as standalone to support the regular update of general knowledge and competence around MiFID II requirements.

Operational risk essentials

EN

This digital learning solution, designed for risk professionals and analysts, will allow them to identify operational risk framework components and establish a risk and control self-assessment matrix for their service or organisation.

Sustainable finance foundations

EN

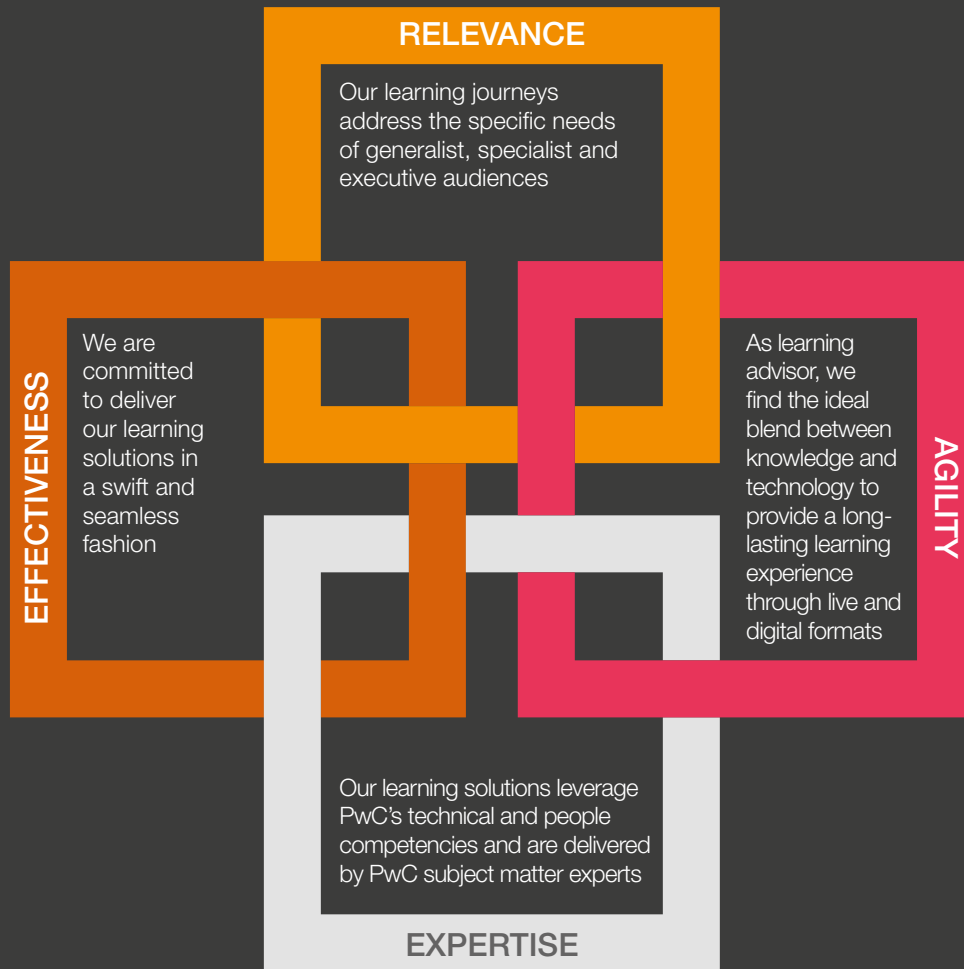

Our sustainable finance e-learning provides a clear baseline knowledge under an interactive design to raise awareness on the related business stakes including ESG related challenges.

Valuation guidelines applicable to private equity and venture capital

EN

This e-learning provides a foundational knowledge on concepts, methodologies and techniques to value interest held in private companies, including recent developments set out in the IPEV guidelines.
